Language Proficiency

English: A2

Polish: B2

Ukrainian: C2

Russian: C2

About Me

I am a programming beginner with a focus on Python. I am completing my second course, which includes web application testing and creating projects using Django. I have practical experience working with Python, HTML, CSS, JavaScript, and SQL.

My Hard Skills

Python: Proficiency in Python programming, including data analysis libraries (Pandas, NumPy).

Databases: Experience with SQL and NoSQL databases (MongoDB, Redis).

Django: Creating web applications based on Django.

SQLAlchemy: Working with the ORM library for Python.

RabbitMQ: Using the message broker system.

Excel and Power BI: Ability to use Excel and Power BI for data analysis and visualization.

Web Scraping: Experience in web scraping using BeautifulSoup, lxml, and Requests.

Scrapy framework: Working with the web scraping framework.

Web Application Testing: Experience in testing web applications, including working with HTML, CSS, JavaScript, and SQL.

My Soft Skills

I possess effective communication skills, enabling me to attract attention and express ideas clearly. I demonstrate adaptability, easily finding my place in any company. Additionally, I am open to improvements through criticism and remain calm under stress. I maintain a constant desire to grow and am interested in acquiring new knowledge and skills. Moreover, I can effectively manage my time and have an internal drive to achieve my goals.

Practical Experience

My practical experience mainly includes hands-on projects during courses at IT schools GetED and GOIT. During my studies at GetED, we tested websites and their applications, such as rozetka.ua, OLX.ua, and dominos.ua. At GOIT, practical assignments included creating a web application using Django.
